Plots marked No under Legal have no timber deed, stumpage contract or property deed on file. Attach the document or remove those loads before signing.

Statement

The wood delivered in this period was harvested in the United States from the plots listed above, under timber deeds, stumpage contracts or ownership on file with the supplier, in compliance with applicable federal, state and local law, including state best management practices for water quality. The plots are working forest land; no deforestation or forest degradation occurred on them after December 31, 2020 (Regulation (EU) 2023/1115). Geolocation of every plot is provided in the accompanying GeoJSON file.

Carbon per ton covers harvest diesel (measured by telematics where available, otherwise logged) and haul to the mill, using the supplier's emission factors. The feedstock is grown and produced in the United States.
